C16

LodeStar™ C16

ADVANTAGES:

- the purest form of palmitic acid min. 98%
- inert product – without taste and smell
- melting point of 55 – 60 °C
- high digestibility – 95%
- ME cattle – 38 MJ
- NEL – 30,4 MJ

Palm oil free fatty acids

IMPORTANCE:

On today's market, there is a growing demand for high milk production, milk fat and fat-soluble vitamins. Simultaneously, it is important to ensure excellent herd fertility. To achieve these goals, breeders use C 16 – a fat protected against rumen degradation. It increases energy intake, decreases appearance of the lipomobilisation syndrome of dairy cows in the first part lactation as well as weight losses. From preventing production diseases point of view, C 16 contributes to reduction of ketosis, hepatosteatorrhea and hepatic coma, rumen dysfunctions and infectious diseases. It reduces appearance of ovary atrophy and ovarian cyst syndrome.

DOSAGES:

0.3 – 0.75 kg per head and day for dairy cows in the first third to half of lactation.
