

in form on the farm®

ProMel

- a combination of quick energy to the forestomachs with ruminal protein source
- at least 25% of crude protein, NEL 8 MJ/kg
- contains a unique light degradable protein concentrate obtained from the production of amino acids
- contains a wide spectrum of amino acids
- supports the creation of microbial protein in the rumen
- increases performance and proportion of milk constituents
- designed for the best dairy cows
- guarantee of balanced quality, low viscosity

Composition:

50% liquid protein concentrate, 50% homogenised beet molasses

Dosage:

500 to 1000 gr per head per day mixed in TMR

Packing:

IBC - 1000 l

Analytical composition:

Crude protein (nitrogen compounds)	26%
Sugar (sucrose)	23%
Crude fat	0%
Crude fiber	0.05%
Crude ash	7.5%
Sodium	2%
Magnesium	0.5%
Potassium	2.5%
Humidity	35%

Liquid feed material for cattle
